Senator Collins’ Kavanaugh Confirmation
29 October 2018

OVERVIEW
Client Adam Wooten has requested the translation of document “Senator Susan Collins Confirmation Speech” (.docx) from source language English into target language Chinese, to be completed by November 30, 2018. The client has not provided a translation memory from a translation of the previous version. Mr. Wooten has requested that we create a new translation memory and glossary to be sent with the final product. To verify the translated text before the project begins, Schrodinger’s Cat Translation House has agreed to send a pseudo-translation of the text and analysis of the word count for Mr. Wooten to verify.

Costs (see quote for more details)
1. Per word cost of source text: $0.20/word. The client has provided no translation memory for the text. The cost of translation is approximately $148.40.
2. Editing costs are calculated on a per hour basis at $40/hour. The estimated time necessary for the project is 1.5 hours of editing (excluding secondary editing based on the client’s requirements), totaling $60.00.
3. Estimated total of the project: $208.40.

Project Scope
Translators assigned: 3 (2 hours/translator) + 1 editor (native Chinese speaker)
Expected completion time: 2 hours/translator + 1.5 hours editing.
Tools: Trados Translation Software, previous in-house Translation Memory for legal documents.

MILESTONES
Preparation Phase
1. Confirm the timeline, translation process and cost with the client. Share a pseudo-translation and word count analysis of the file with the client to confirm that correct documents/portions are being translated.
2. Share in-house legal translation memory (American political system translation memory) and any materials provided by the client (translation memory or style guide) with assigned translators.

3. Use Antconc term extraction to find frequently occurring terms in the text, create glossary for terms. This will also be shared with translators.

**Translation Phase**

1. Begin formal translation of the document in Trados. Translation memory will be continuously updated to ensure consistency across translations. Translation will be completed on a paragraph-by-paragraph basis (formatted as the client has sent).

2. Once translation is completed, translations will be compiled and edited by head translator of the project (Ji Yuan).

3. In addition to style, editing will undergo a rigorous machine-based quality assurance process facilitated by Trados. This will check formatting of the document, including spacing, numbers, punctuation, spelling, word count, etc.

**Finalization Phase**

1. After editing, the project manager (Eli Estridge) will send a Trados package of the translated document to client. At this stage, the client will have the ability to examine and suggest changes to the document. The client will then send a return package to project manager.

2. Return package will be sent to editor for final edits. After final edits are completed, the project manager will send deliverables (see below) to the client.

3. After the client has received the deliverables and the project has come to a close, Schrodinger’s Cat Translation House will send a satisfaction survey to client. If the client has any questions, comments, or suggestions for future translations, they can use this platform to communicate with us.

**TIMELINE**

October 30: Kickoff Meeting, Preparation Phase.

November 5: Preparation Phase ends, Translation Phase begins.

November 15: Translation Phase ends, Translation package is sent to client.

November 20: Client sends return package, Finalization Phase begins.

November 30: Deliverables and Satisfaction Survey are sent to client.

**DELIVERABLES**

[1] Pseudo-translated text and word count analysis
[3] Translation memory and glossary
Scope of Work

Client Adam Wooten has requested the translation of document “Senator Susan Collins Confirmation Speech” (.docx) from source language English into target language Chinese. The client has not provided a translation memory from a translation of the previous version. Mr. Wooten has requested that we create a new translation memory and glossary to be sent with the final product. We will also be sending a pseudo-translation of the text and analysis of the word count for Mr. Wooten to verify.

Deliverables

1) Translation of Senator Susan Collins Confirmation Speech into Chinese, sent in both .pdf and .txt formats.

2) Translation memory and glossary.

3) Pseudo Translation and Word Count Analysis.

Time Frame

Client Adam Wooten has requested that this translation be completed before November 30, 2018. Based on the size of this text (742 words), the current time frame falls under our normal rate. However, the applicability of this time frame may be readjusted based on the client’s needs.

Conditions

Payment Method: We accept all major credit cards, Paypal, and check upon request. We are also willing to accept other payment options upon request.
Payment Terms: Within 30 days from the date of our invoice.

Quote Valid for: 60 days.

Signature

We look forward to your response. Please don’t hesitate to contact me directly at (987) 654-3210 should you have any queries regarding the project.

The five previous times that I’ve come to the floor to explain my vote on the nomination of a justice to the United States Supreme Court, I have begun my floor remarks explaining my decision with a recognition of the solemn nature and the importance of the occasion. But today we have come to the conclusion of a confirmation process that has become so dysfunctional, it looks more like a caricature of a gutter-level political campaign than a solemn occasion.

The president nominated Brett Kavanaugh on July 9. Within moments of that announcement, special interest groups raced to be the first to oppose him, including one organization that didn’t even bother to fill in the judge’s name on its pre-written press release. They simply wrote that they opposed Donald Trump’s nomination of “XX” to the Supreme Court of the United States. A number of senators joined the race to announce their opposition, but they were beaten to the punch by one of our colleagues who actually announced opposition before the nominee’s identity was even known.

Since that time, we have seen special interest groups whip their followers into a frenzy by spreading misrepresentations and outright falsehoods about Judge Kavanaugh’s judicial record. Over-the-top rhetoric and distortions of his record and testimony at his first hearing produced short-lived headlines, which although debunked hours later, continued to live on and be spread through social media. Interest groups have also spent an unprecedented amount of dark money opposing this nomination. Our Supreme Court confirmation process has been in steady decline for more than 30 years.
One can only hope that the Kavanaugh nomination is where the process has finally hit rock bottom. Against this backdrop, it is up to each individual senator to decide what the Constitution’s advice and consent duty means. Informed by Alexander Hamilton’s Federalist 76, I have interpreted this to mean that the president has broad discretion to consider a nominee’s philosophy, whereas my duty as a senator is to focus on the nominee’s qualifications as long as that nominee’s philosophy is within the mainstream of judicial thought.

***

One concern that I frequently heard was that the judge would be likely to eliminate the Affordable Care Act’s vital protections for people with preexisting conditions. I disagree with this. In a dissent in Seven-Sky v. Holder, Judge Kavanaugh rejected a challenge to the ACA on narrow procedural grounds, preserving the law in full. Many experts have said that his dissent informed Justice Roberts’s opinion upholding the ACA at the Supreme Court.
Furthermore, Judge Kavanaugh’s approach toward the doctrine of severability is narrow. When a part of a statute is challenged on constitutional grounds, he has argued for severing the invalid clause as surgically as possible while allowing the overall law to remain intact. This was his approach in a case that involved a challenge to the structure of the consumer financial protection bureau. In his dissent, Judge Kavanaugh argued for “severing any problematic portions while leaving the remainder intact.” Given the current challenges to the ACA proponents, including myself, of protections for people with preexisting conditions, some should want a justice who would take just this kind of approach.

</tr>
</thead>
<tbody>
<tr>
<td>There has also been considerable focus on the future of abortion rights based on the concern that Judge Kavanaugh would seek to overturn <em>Roe v. Wade</em>. Protecting this right is important to me. To my knowledge, Judge Kavanaugh is the first Supreme Court nominee to express the view that precedent is not merely a practice and tradition, but rooted in Article 3 of our Constitution itself. He believes that precedent is not just a judicial policy, it is constitutionally dictated to pay attention and pay heed to rules of precedent. In other words, precedent isn’t a goal or an aspiration. It is a constitutional tenet that has to be followed except in the most extraordinary circumstances.</td>
</tr>
</tbody>
</table>
The judge further explained that precedent provides stability, predictability, reliance and fairness. There are, of course, rare and extraordinary times where the Supreme Court would rightly overturn a precedent. The most famous example was when the Supreme Court in Brown vs. The Board of Education overruled Plessy vs. Ferguson, correcting a “grievously wrong decision” to use the judge’s term, allowing racial inequality. But someone who believes that the importance of precedent has been rooted in the Constitution would follow long-established precedent except in those rare circumstances where a decision is grievously wrong or deeply inconsistent with the law.
